VAYU BRAHMAN

SMART INDIA HACKATHON 2026

Proposed Solution

• **Personalized Tourism** – Suggests suitable destinations according to the traveller's interests, budget, duration, and preferences.

• **Smart & Less-Crowded Destinations** – Combines popular and new/lesser-known places with crowd analysis and historical data to reduce overcrowding.

• **Complete Destination Guide** – Offers images, descriptions, best visiting time, transportation, hotels, food, malls, and other nearby facilities in one platform.

• **Safety & Emergency Assistance** – Helps travellers access nearby hospitals, police stations, emergency services, and safety-related information.

• **Local Tourism & Cultural Connection** – Connects travellers with local partners for trips, hotels, food, clothing and cultural experiences, supporting local tourism.

Innovation & Uniqueness

Personalized Destination Matching – Match travellers with destinations based on their interests, budget, travel time, and preferred experience instead of giving generic suggestions.

• **Beyond Popular Places** – Discover suitable lesser-known destinations near popular tourist locations, giving travellers more choices while reducing pressure on overcrowded spots.

• **Smart Crowd Intelligence** – Analyse past crowd patterns and travel trends to identify crowded periods and recommend better visiting times.

Addressing the Challenges

Personalized Destination Matching – Match travellers with destinations based on their interests, budget, travel time, and preferred experience instead of giving generic suggestions.

• **Beyond Popular Places** – Discover suitable lesser-known destinations near popular tourist locations, giving travellers more choices while reducing pressure on overcrowded spots.

• **Smart Crowd Intelligence** – Analyse past crowd patterns and travel trends to identify crowded periods and recommend better visiting times.

TECHNICAL APPROACH

SMART INDIA HACKATHON 2026

Key Points

- **Web Technologies**
  HTML, CSS and JavaScript are used for the frontend (user interface).
- **Backend Framework**
  Django (Python) is used to handle business logic, routing and authentication.
- **Database**
  SQLite is used as the default database to store user data and application information.
- **Authentication**
  Django's built-in authentication system is used for secure login and user management.
- **Integration**
  The existing frontend is converted into Django templates and connected with the backend for a seamless user experience.

Technology Flow Chart

FEASIBILITY AND VIABILITY

SMART INDIA HACKATHON 2026

Technical Feasibility

- **Available Technology** – Uses mobile/web platforms, GPS, maps, databases and APIs.
- **Easy Integration** – Can connect tourism, weather, transport and accommodation services.
- **Scalable Platform** – Can expand to more destinations, users and tourism services

Operational Feasibility

- **Simple Interface** – Makes searching and trip planning easy for travellers.
- **All-in-One Information** – Provides destinations, crowd levels, best time, safety and nearby facilities together.
- **Partner Connectivity** – Connects travellers with hotels, guides, transport and local services

Economic Viability

- **Low Development Cost** – Uses existing technologies and open-source tools.
- **Local Business Opportunities** – Creates visibility for hotels, guides, restaurants and local services.
- **Sustainable Revenue** – Enables partnerships with tourism and hospitality providers

Social Viability

- **Safer Travel** – Provides easy access to essential safety and emergency information.
- **Local Community Support** – Connects tourists with local businesses and service providers.
- **Balanced Tourism** – Promotes lesser-known destinations and reduces overcrowding.
- **Cultural Promotion** – Encourages travellers to explore and experience local culture.

IMPACT AND BENEFITS

SMART INDIA HACKATHON 2026

TOURISM IMPACT

USER REQUIREMENTS
Budget • Time • Interests • Preference

↓

SMART DESTINATION DISCOVERY
Popular + Lesser-known Places

↓

CROWD & BEST-TIME ANALYSIS
Better timing • Less overcrowding

↓

PERSONALIZED TRIP PLANNING
Places • Activities • Stay • Transport

↓

SAFETY & LOCAL CONNECTIVITY
Hospitals • Police • Local Services

↓

BETTER TOURISM EXPERIENCE Safer •Smarter • Balanced • Sustainable

Key Benifits

FOR TRAVELLERS

- **Easy Planning** – Personalized trip planning and less-crowded places.
- **Safer Travel** – Nearby safety and essential facilities.
- **Better Experience** – Discover more, stress less, travel smarter.

FOR LOCAL COMMUNITIES

- **More Visibility** – Local guides and businesses get better exposure.
- **More Opportunities** – New tourism opportunities create jobs and income.
- **Cultural Promotion** – Local culture, art and traditions reach more people.

FOR TOURISM & ENVIRONMENT

- **Balanced Tourism** – Tourist traffic is distributed across destinations.
- **Less Overcrowding** – Lesser-known places get more attention.
- **Sustainable Growth** – Reduces pressure on popular locations and supports sustainable tourism.
